

## 5 Amp Low Dropout Positive Voltage Regulator

The PJ1084 Series are high performance positive voltage regulators are designed for use in applications requiring low dropout performance at full rated current, Additionally, the PJ1084 Series provides excellent regulation over variations due to changes in line, load and temperature. Outstanding features include low dropout performance at rated current, fast transient response, internal current limiting and thermal shutdown protection of the output device. The PJ1084 Series are three terminal regulators with fixed and adjustable voltage options available in popular packages.

### FEATURES

- Low dropout performance 1.3V max.
- Full current rating over line and temperature
- Fast transient response
- Total output regulation  $\pm 2\%$  over line, load and temperature
- Adjust pin current max  $120 \mu A$  over temperature
- Line regulation typical 0.015%.
- Load regulation typical 0.05%.
- Fixed/adjustable output voltage
- TO-220 & TO-263 & TO-263-2L & TO-252 package
