- See TSV99x, TSV99xA for higher gain bandwidth (not unity gain stable)

Description

The TSV91x operational amplifiers (op amps) offer low voltage operation and rail-to-rail input and output, as well as an excellent speed/power consumption ratio, providing an 8 MHz gain-bandwidth product while consuming only 1.1 mA maximum at 5 V. The op amps are unity gain stable and feature an ultra-low input bias current.

The devices are ideal for sensor interfaces, battery-supplied and portable applications, as well as active filtering.

Reference	Single	Dual	Quad
TSV91x	TSV911	TSV912	TSV914
TSV91xA ⁽¹⁾	TSV911A	TSV912A	TSV914A

Notes:

⁽¹⁾Suffix "A" refers to enhanced V_{io} performance

Features

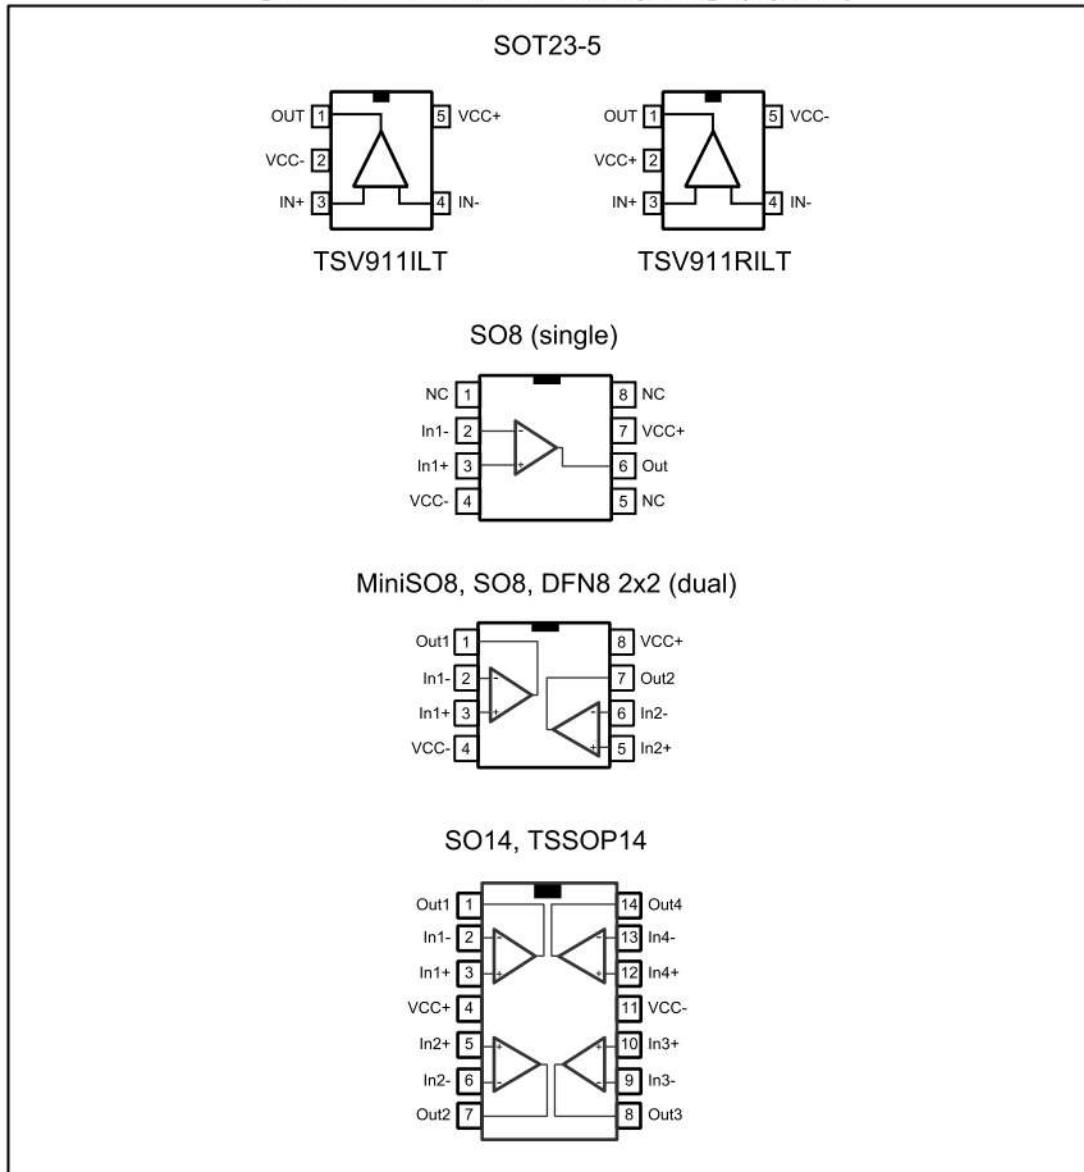

- Rail-to-rail input and output
- Wide bandwidth
- Low power consumption: 820 μ A typ
- Unity gain stability
- High output current: 35 mA
- Operating from 2.5 V to 5.5 V
- Low input bias current, 1 pA typ
- Low input offset voltage: 1.5 mV max (A grade)
- ESD internal protection \geq 5 kV
- Latch-up immunity

Notes:

⁽¹⁾All voltage values, except the differential voltage, are with respect to network ground terminal.

⁽²⁾Differential voltages are the non-inverting input terminal with respect to the inverting input terminal

⁽³⁾V_{CC} - V_{IN} must not exceed 6 V

⁽⁴⁾Input current must be limited by a resistor in series with the inputs

⁽⁵⁾Short-circuits can cause excessive heating and destructive dissipation.

⁽⁶⁾R_{th} are typical values

⁽⁷⁾Human body model: 100 pF discharged through a 1.5 kΩ resistor between two pins of the device, done for all couples of pin combinations with other pins floating.

⁽⁸⁾Machine model: 200 pF charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor < 5 Ω), done for all couples of pin combinations with other pins floating

(⁹)Charged device model: all pins plus packages are charged together to the specified voltage and then discharged directly to the ground.

5 Application information

5.1 Driving resistive and capacitive loads

These products are low-voltage, low-power operational amplifiers optimized to drive rather large resistive loads above 2 kΩ.

In a *follower* configuration, these operational amplifiers can drive capacitive loads up to 100 pF with no oscillations. When driving larger capacitive loads, adding a small in-series resistor at the output can improve the stability of the device (*Figure 19* shows the recommended in-series resistor values). Once the in-series resistor value has been selected, the stability of the circuit should be tested on bench and simulated with the simulation model.

Figure 19: In-series resistor vs. capacitive load

5.2 PCB layouts

For correct operation, it is advised to add 10 nF decoupling capacitors as close as possible to the power supply pins.

5.3 Macromodel

An accurate macromodel of the TSV91x is available on STMicroelectronics' web site at: www.st.com. This model is a trade-off between accuracy and complexity (that is, time simulation) of the TSV91x operational amplifiers. It emulates the nominal performances of a typical device within the specified operating conditions mentioned in the datasheet. It helps to validate a design approach and to select the right operational amplifier, *but it does not replace on-board measurements*.

6 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: www.st.com.

8 Revision history

Table 14: Document revision history

Date	Revision	Changes
28-Aug-2006	1	First release.
07-Jun-2007	2	<p>Modified ESD CDM parameter for SO-14 package in Table 2: Absolute maximum ratings.</p> <p>Noise parameters updated in Section 2: Electrical characteristics.</p> <p>Added limits in temperature in Section 2: Electrical characteristics.</p> <p>Added automotive grade level description in Table 13: Order codes.</p> <p>Added footnote about SO-14 package in Table 13: Order codes.</p> <p>Added Figure 16: Phase margin vs. capacitive load and serial resistor.</p>
11-Feb-2008	3	<p>Updated footnotes for ESD parameters in Table 2: Absolute maximum ratings.</p> <p>Corrected MiniSO-8 package information in Table 9: MiniSO-8 package mechanical data.</p> <p>Added missing markings for order codes TSV911AILT and TSV912AILT in Table 13: Order codes.</p>
22-Jun-2009	4	<p>Added input current information in Table 2: Absolute maximum ratings.</p> <p>Changed Figure 7 and Figure 8.</p> <p>Added Chapter 3: Application information.</p> <p>Updated package information in Chapter 4.</p> <p>Added automotive order codes: TSV911IYLT, TSV911AIYLT, TSV912IYST, TSV912AIYST, TSV914IYPT and TSV914AIYPT in Table 13: Order codes.</p>
17-Sep-2009	5	<p>Added A versions of devices in title on cover page.</p> <p>Modified ESD value for machine model in Table 2: Absolute maximum ratings.</p> <p>Added Figure 17: Supply current vs. supply voltage on page 10.</p>
18-Mar-2010	6	Added TSV911RILT in Table 13: Order codes, housed in a SOT23-5 package with a new pinout.
24-Jun-2010	7	<p>Added pin connections for TSV911ILT and TSV91RILT on cover page.</p> <p>Added Table 1: Device summary on cover page.</p> <p>Modified supply voltage value in Table 3.</p> <p>Corrected typical value of DV_{io} in Table 4, Table 5 and Table 6.</p> <p>Added TSV911RILT, TSV911IYDT and TSV911AIYDT order codes in Table 13.</p> <p>Modified Note 2 under Table 13.</p>
06-Mar-2012	8	Added DFN8 2x2 package and ordering information for TSV912 device to Chapter 4 and Chapter 5.
27-Nov-2015	9	<p>Updated layout</p> <p>Section 2: replaced DV_{io}/DT by ΔV_{io}/ΔT.</p> <p>Section 5.2: updated name of package and title of drawings and table; added note about exposed pad.</p> <p>Table 13: "Order codes": removed obsolete order codes (TSV911ID, TSV911AID, TSV912ID, TSV912AID, TSV914ID, TSV914AID).</p>

Revision history**TSV91x, TSV91xA**

Date	Revision	Changes
29-Aug-2016	10	<p>Added silhouettes of packages to cover page</p> <p>Placed pinout diagrams in <i>Section 2: "Package pin connections"</i></p> <p>Added <i>Related products</i></p> <p><i>Description:</i> added footnote 1</p> <p><i>Section 7.2: "DFN8 2 x 2 package information":</i> modified note about the exposed pad.</p> <p><i>Section 8: "Ordering information":</i> removed note regarding "moisture sensitivity level 1".</p>
