

KFC-6X6X4.5-4P SMD

- SPECIFICATION**

KFC-6X6 SMD TACTILE SWITCH:

KFC-6X6 is an on/off smd tactile switch that is only on when the button is pressed or if there is a definitive change in pressure.

It was used for circuit board, there are many different kinds of height for the switch knob, the standard height range is 4.3mm to 23mm.

The Tactile Switch applications include: Low power, miniature devices, digital switching, anything where operator feedback is required (a switch confirmation coming from the switch being depressed) will find that the perfect choice is a Tactile switch.
