

TDA2030

Audio Amplifier Module

TDA2030 Audio Amplifier module is based on the TDA2030 audio amplifier chip, which is capable of 18 W output power with low harmonic distortion.

Specifications

- On-board TDA2030A audio amplifier chip
- 18 W mono amplifier circuit design
- On-board terminal blocks for speaker
- Onboard 10K potentiometer for volume adjustment
- Onboard power indicator
- The main pins have been routed to a standard pin header
- Operating Voltage Range: 6 V to 12 V
- Board Size: 32 x 24 mm
