

# INTERFACE ADAPTER PLATE LCD1602 IIC/I2C

Interface Adapter Plate LCD1602 IIC/I2C is an LCD interface adapter for Arduino without the LCD screen. Since Arduino board I/O ports are limited using Interface Adapter Plate LCD1602 IIC/I2C will let you add extra devices to your Arduino board. The module supports I2C protocol and the LCD contrast can be adjusted using the potentiometer on the board.

## **Product Description**

support the I2C protocol

with backlight and contrast adjustment potentiometer

4 Line Output

Supply voltage: 2.5-6V
