

NEW

# HLK-10M12B

220V to 12V 833mA · 10W

## New Solution/More Competitive

Lower price HLK-10M12B compatible with HLK-10M12 AC to DC 12v 10w Step Down mini Power Supply Module Converter Intelligent household switch power module

# AC/DC-10WB Series Power Module List

MULTIPLE SPECIFICATIONS AVAILABLE

- International standard pins, PCB board installation
- Wide voltage 85-265VAC/120-350VDC input
- Ultra small isolated power module
- Stable single output
- Working temperature -25°C-- +60°C

Model	Input Voltage	Output Voltage/Current
HLK-10M03B		3.3V/3000mA
HLK-10M05B		5V/2000mA
HLK-10M09B	10W	9V/1100mA
HLK-10M12B		12V/830mA
HLK-10M15B		15V/660mA
HLK-10M24B		24V/420mA

## Product Features

- Global universal input voltage(85-265VAC)
- Input and output isolation voltage 3000VAC
- Low power consumption, green environment protection, no-load loss < 0.1W
- High efficiency, high power density

- Long life design, continuous working time is greater than 100,000 hours
- High output-quality environmentally friendly waterproof thermal conductive glue potting, dustproof, moisture-proof, shockproof, flame-retardant
- Meet UL/CE/EMC and safety testing requirements
- Can be used in medical, industrial control, electric power, instrumentation, communication, railway and other fields

### **Environment Condition**

Working Temperature	-25—+60 °C
Storage temperature	-40—+80 °C
Relative humidity	5—95 %
Thermal methods	Natural cooling
Atmospheric pressure	80—106 Kpa
Altitude	≤2000 m
Vibration coefficient	10~500Hz, 2G 10min./1cycle, 60min. each along X,Y,Z axes. Meets secondary road transportation requirements

### **Input Features( test at room temperature)**

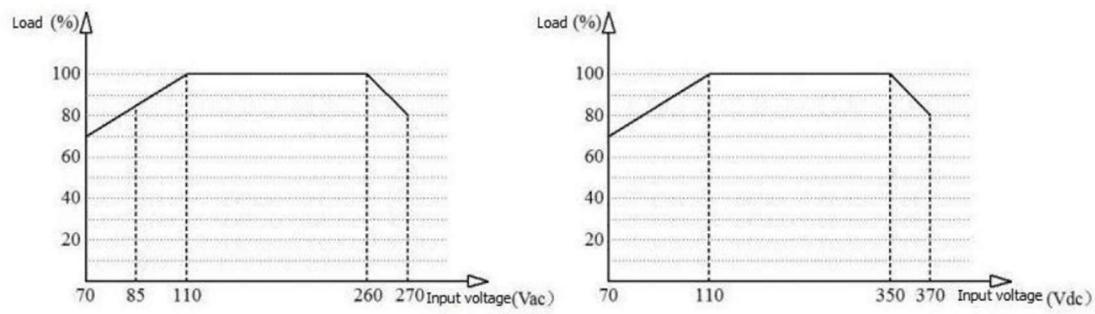

Rated input voltage	100-240Vac
Input voltage range	85-265VAC/120-350VDC
The maximum input CURRENT	≤0.2A
Input inrush current	≤10A

Input low start	$\leq 300\text{mS}$
Long-term reliability	$\text{MTBF} \geq 100000\text{H}$
External fuse recommended	1A/250Vac or $10\Omega$ wire wound resistance, Slow blow

### **Output Features**

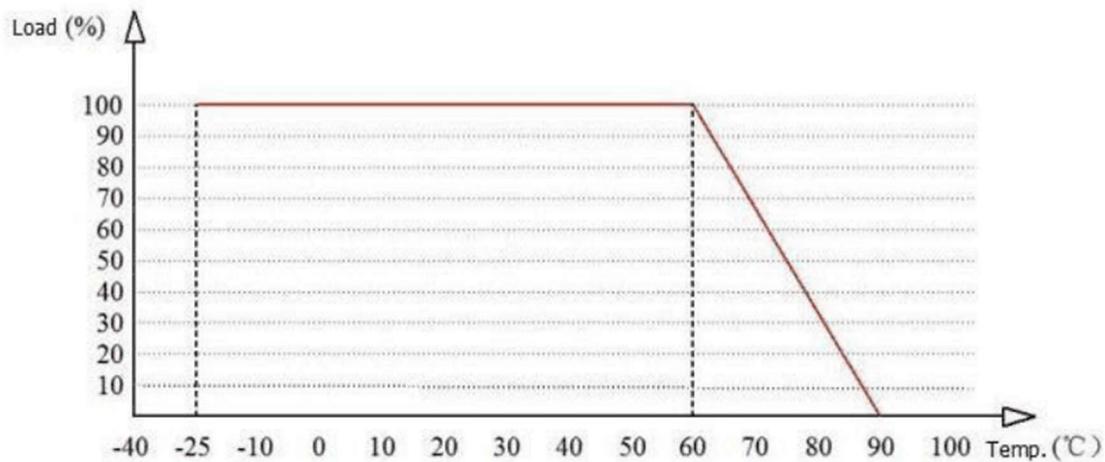

No-load rated output voltage	$5.0 \pm 0.1\text{Vdc}$
Full-load rated output voltage	$5.0 \pm 0.2\text{Vdc}$
Short term maximum output current	$\geq 1200\text{mA}$
Rated output current	1000mA
Voltage regulation rate	$\pm 0.2\%$
Load regulation rate	$\pm 0.5\%$
Switching on/off overshoot amplitude	(Rated input voltage, output with 10% load) $\leq 5\%V_o$
Output over-current protection	110-150% A
Output maximum load	
Ripple/Noise	$\leq 100\text{mVp-p(Typ:50)}$

### **Input Voltage & Load Characteristics**

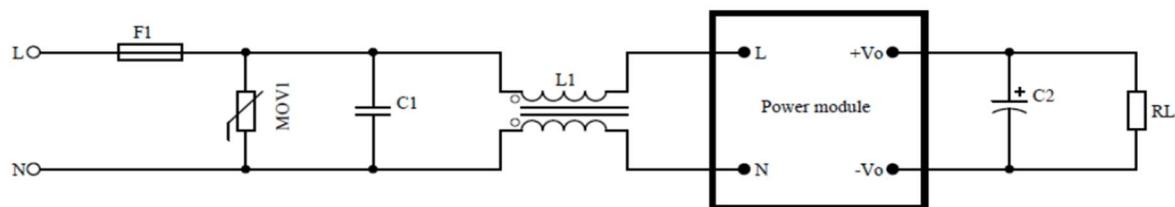

Input voltage and load characteristic curve

### Working Environment Temperature & Load Characteristics

Environmental temperature and load characteristic curve

### Typical Application Circuit

## **Parameter Recommendation**

F1/Fuse:1A/250Vac or 10Ω wire wound resistor, slow fuse

MOV1/Varistor:10D561K(The cumulative surge is to protect the module from damage)

C1/Safety capacitance: 0.1uF/275VAC(Filtering/safety protection/EMC certification)

L1/Common-mode inductance:Sensible value 10-30mH(testing requirements 1KHZ/0.3V current:100-500mA). EMI filtering

## **Safety Characteristics**

**Meet UL/CE requirements**(UL/CE certification requires customers to self-certify)

Safe compatible with battery

The input end design adopts UL certification 1A insurance

The fire ration of PCB board is 94-V0

Safety standards comply with UL1012,EN60950,UL60950

Insulation voltage I/P-O/P > 2500Vac

Insulation resistance I/P-O/P > 100M Ohms/500Vdc 25°C 70%RH

Conforms to radiation EN55011, EN55022(CISPR22)

Electrostatic discharge IEC/EN 61000-4--2 level4 8KV/15KV

## **Temperature rise safety design**

Under normal conditons, the maximum temperature rise of the inner surface of the power supply capacitor,

main converter, etc. does not exceed 90°C, and the maximum temperature rise of the shell surface does not exceed 60°C
